What does the onboarding process look like for parents/members?

You begin by creating and sharing direct links to the services on the Abler booking platform. Each service can either be made publicly available for anyone to sign up on your booking platform or shared privately via a unique link for a specific group — depending on what works best for the organization.

Once parents receive the link, they start by signing up and creating an Abler account. During this process, they add their child or children, and then proceed to complete the registration for the selected service.

After completing registration, parents are prompted to download the Abler app directly from the success screen. A welcome email is also sent when the account is created, explaining what Abler is and highlighting the benefits of using the app to stay updated on their child's schedule and activities.
